Index extensively revised and reformatted 2014 by Rob Smith.

Each number corresponds to a shape or shape family, many of which were made in more than one size.

Uncut blanks as well as cut and engraved pieces are pictured in this catalog.

Shape names used in this index are consistent with those found in the 1896 (or later) Libbey catalogs.

Location designations are numbered rows top-to-bottom, then position, left to right. U = upper, M = middle, L = lower.

Many of the shapes pictured in this catalog do not appear in any other surviving New England or Libbey documentation.
